## Programmable Scales

### Procharge 100P Specification Sheet

#### Product Introduction

The Procharge 100P is a fully programmable digital refrigerant charging scale in addition to the standard version. It is a fully programmable unit, the user has the ability to program the required charge without having to monitor the process.

These units are highly accurate with 5 gram resolution and an increased weighing capacity of 100kg. The compact platform is 223mm x 223mm, easily removed from the

carry case for use, also featuring an easy to read LCD display.

This unit also includes a memory function, holding the last reading until cleared. Even when the unit automatically shuts down after 10 minutes of non use, the last reading is still stored in memory.
